ABSTRACT

This report presents the Texas Assessment of Academic Skills (TAAS) performance results to state officials and the public as required by state law. Compiled in two volumes, TAAS results are aggregated and reported for the state as a whole, for education service centers and individual districts, and in district demographic groupings. This volume lists performance results in tabular form alphabetically by school district for non-special education students for each grade level tested. Results are given for grades 3, 3-Spanish, 5, 7, 9, 11, and 12 for the October 1991 TAAS administration and for grades 11 and 12 for the spring 1992 TAAS administration. The Texas Educational Assessment of Minimum Skills (TEAMS) exit level results are provided for grade-12 students testing in October 1991 and spring 1992 administrations. (SLD)

Introduction

Volume 2 of the *Texas Assessment of Academic Skills (TAAS) Student Performance Results 1991 - 1992* lists performance results, alphabetically, by school district for each grade level tested. These results are reported for all students tested, with the exception of those students identified as special education students. District results are provided for Grades 3, 3-Spanish, 5, 7, 9, 11, and 12 for the October 1991 TAAS administration and for Grades 11 and 12 for the Spring 1992 TAAS administration. The Texas Educational Assessment of Minimum Skills (TEAMS) exit level results are provided for the Grade 12 students tested during the October 1991 and Spring 1992 administrations.

In examining the TAAS/TEAMS data contained in this volume, the following information should be considered.

- The October 1991 TAAS district-level performance results for Grades 3, 3-Spanish, 5, 7, 9, and 11 include the percent of students meeting minimum expectations on all tests taken, scale score performance in each subject area, scale score gains/losses by subject area between the October 1991 and October 1990 administrations, and the number of students needing remediation in one or more subject areas.

- The following TAAS performance results are reported by school district for the Grade 11 students tested in Spring 1992 and the Grade 12 students tested in October 1991 and Spring 1992: the percent of students meeting minimum expectations on all tests taken, the percent of students meeting minimum expectations in each subject area, scale score performance in each subject area, and the number of students needing remediation in one or more subject areas.

- This report provides performance results, as described above, for nonspecial education students only. It does not include results for students identified as special education students. Students are identified as special education students if any of the following categories were marked on their individual answer sheet: learning disability, emotionally disturbed, speech handicapped, visually handicapped, or other (non-visual) handicapping conditions.

- To maintain confidentiality of individual student results, district level performance data are replaced with asterisks for districts in which fewer than five students were tested in a given subject area.

- Student performance on the TAAS and TEAMS tests varies from district to district. When comparing district results, demographic factors such as composition of the student population, student mobility, and district size and wealth should be considered since they may be related to student performance results.

- The performance of individual students in small student populations affects district results to a greater extent than in districts where large numbers of students are tested.

- The Grade 12 TEAMS performance results reported for each school district include the percent of students passing all test taken, scaled scores in each subject area, and the number of students needing remediation in one or more subject areas. Scaled score gain/loss comparisons are not reported for the Grade 12 TEAMS administrations. The TEAMS results do not include performance results for students identified as special education students.

Volume 1 of the *Texas Assessment of Academic Skills (TAAS) Student Performance Results 1991-1992* reports statewide performance and trends, performance data aggregated by demographic characteristics, and regional results.
